EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Terry L. Miller on 10 March 2004.

The application has been amended as follows:

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 5-7 been renumbered 4-6.

In Claim 5 line 1 "programmable controller" has been replaced with ---control system---.

In Claim 6 line 1 "programmable controller" has been replaced with ---control system---.

2. The following is an examiner's statement of reasons for allowance: the prior art does not discloses a paintball gun comprising, in addition to other features a trigger that includes a pair of oppositely extending wings, the trigger disposed on a pivot intermediate of the wings such that the trigger has two firing positions and a neutral position intermediate the firing positions, with each of the firing positions corresponding to opposing rocking directions of the trigger and a means to effect a firing action of the gun in response to rocking of the trigger or on the other

Art Unit: 3644

hand an electrical circuit cooperating with a trigger and a solenoid to effect a firing action in response to a trigger movement and a pair of switches that alternate in operation with one another to provide input to the electrical circuit to effect a firing action. The prior art does disclose several devices that utilize a trigger to fire a paintball and that utilize an electric circuit and solenoid that fire a paintball in response to movement of a trigger. However none of these device comprise a trigger that rocks in two directions about a central pivot such that rocking in either direction will initiate a firing action of the gun, nor do these devices comprise an electric circuit that is activated to initiate a firing action of the gun in response to actuation of one of a pair of switches that alternate with one another in operation. Specific examples of the current state of the art mentioned above can be found in USPT 6,343,599 to Perrone and USPT 6,349,711 to Perry et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doyle (USPT 3,273,553) discloses an electromagnetically operated gun comprising a circuit, trigger and switch. Fujimoto (USPT 6,561,176) discloses a paintball gun comprising a bolt assembly actuated by a pneumatic ram. Gardner (USPT 6,644,296) discloses a dynamic paintball gun control comprising a circuit board and sensor. Juan (USPT 6,360,736) discloses an air gun firing system comprising an electric circuit and solenoid. McKendrick (USPT 6,532,949)

Art Unit: 3644

discloses a paint ball gun kit assembly comprising electronically actuated bolt and hammer assemblies. Moritz (USPT 6,637,420) discloses a closed bolt assembly for a paintball marker gun comprising a bolt actuation assembly. Perrone (USPT 6,343,599) discloses a paintball gun with pulse valve firing mechanism comprising an electric circuit, solenoid, trigger and switch. Perrone (US 2001/0042543) discloses an electrically operated paintball gun having hammer and bolt mechanism comprising an electric circuit, solenoid, trigger and switch. Perry (USPT 6,349,711) discloses a low pressure electrically operated pneumatic paintball gun comprising an electric circuit, solenoid, trigger and switch. Rice (USPT 6,138,656) discloses a paint ball gun comprising an electric circuit, solenoid, trigger and switch. Taylor (USPT 6,694,963) discloses a touch trigger for electronic paintball gun that operates with a switch to actuate an electric circuit and solenoid. Wolff (USPT 4,009,536) discloses a trigger mechanism for firearms comprising a trigger, switch, electric circuit and solenoid.
